40 BILLION

PLASTIC UTENSILS PER YEAR ARE TOTALLY WASTED

Do you have a drawer full of plastic utensils from ordering takeout? You know the one - you're afraid to open it because you may not be able to shut it against the wave of plastic inside. **Plastic cutlery often comes with your food whether you need it or not.** People are getting fed up with the flood of uneeded utensils and are joining together to say *"Enough!"*

TAKE ACTION!

Join others in telling restaurants **"I don't need plastic utensils/sauce packets/straws/napkins"** when you place your order. And when restaraunts save money on wasteful spending, those savings may just come back around to you.

You have the power to turn the tide on single-use plastics.
